1. System Overview

The **Wina Bwangu Booth Agent Terminal** is an web-based workstation created for mobile money booth agents operating across Lusaka District. The system allows agents to log into their terminal, select their specific booth location, process customer transactions across multiple networks, auto-calculate revenues and taxes, and track total service limits in real time.

2. System Requirements

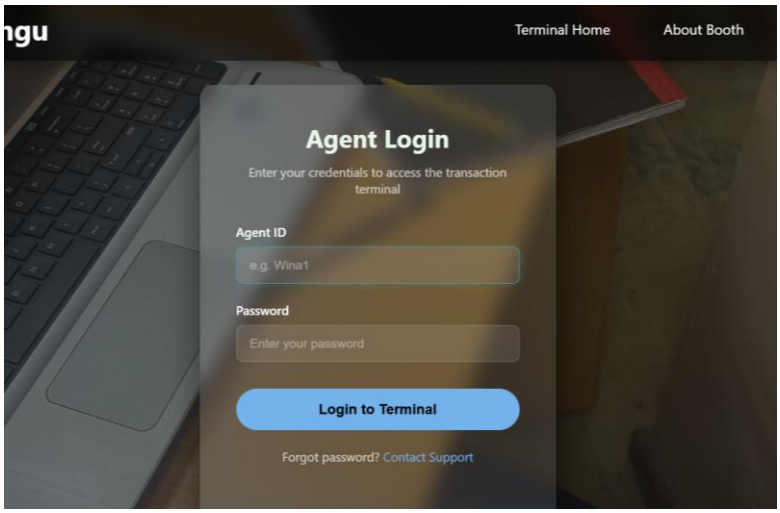

- **Device:** Desktop PC, Laptop, or Tablet.
- **Browser:** Google Chrome, Microsoft Edge, or Mozilla Firefox.
- **Network:** Local internet or network connection.

3. Agent Login Instructions

To start your shift and access the transaction terminal:

1. Open your browser and navigate to the **Agent Login** page (login.html).
2. Enter your assigned **Agent ID** (e.g., Wina1, Wina2, up to Wina6).
3. Enter your **Password**
4. Click the **"Login to Terminal"** button.

Note: If you enter an incorrect Agent ID or password, an error message will display: *"Invalid Agent ID or Password. Please try again."*

LOGIN PAGE

4. Step-by-Step Transaction Processing

Once logged in, you will automatically be redirected to the **Transaction Dashboard**

Follow these steps to process a cash transaction:

Step 1: Check Auto-Generated Transaction ID

- The terminal automatically creates a unique **Transaction ID** (e.g., WB0000021). This field is read-only.

Step 2: Select Mobile Booth

- Click the **Mobile Booth** dropdown menu and select your active booth (e.g., Wina1, Wina2, Wina3, etc.).
- The **Location** field will automatically fill in based on your booth choice (e.g., Wina1 → *Lusaka CBD*, Wina2 → *Libala*, Wina3 → *Kabwata*).

Step 3: Select Service Operator

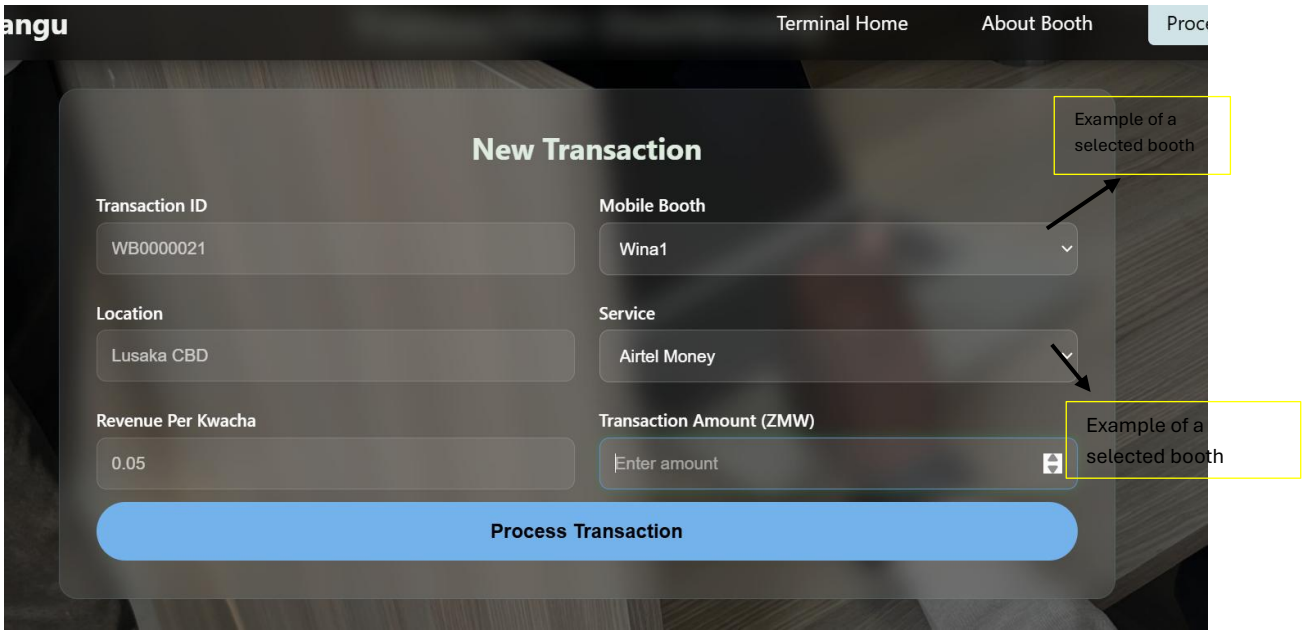

- Click the **Service** dropdown menu. The terminal will display only the available services for that booth.
- Choose the service requested by the customer (e.g., *Airtel Money*, *MTN Money*, *Zamtel Money*, *Zanaco*, or *FNB*).
- The **Revenue Per Kwacha** field will automatically update with the official rate.

Step 4: Enter Transaction Amount

- Type the requested amount in Kwacha into the **Transaction Amount (ZMW)** field.

Step 5: Process the Transaction

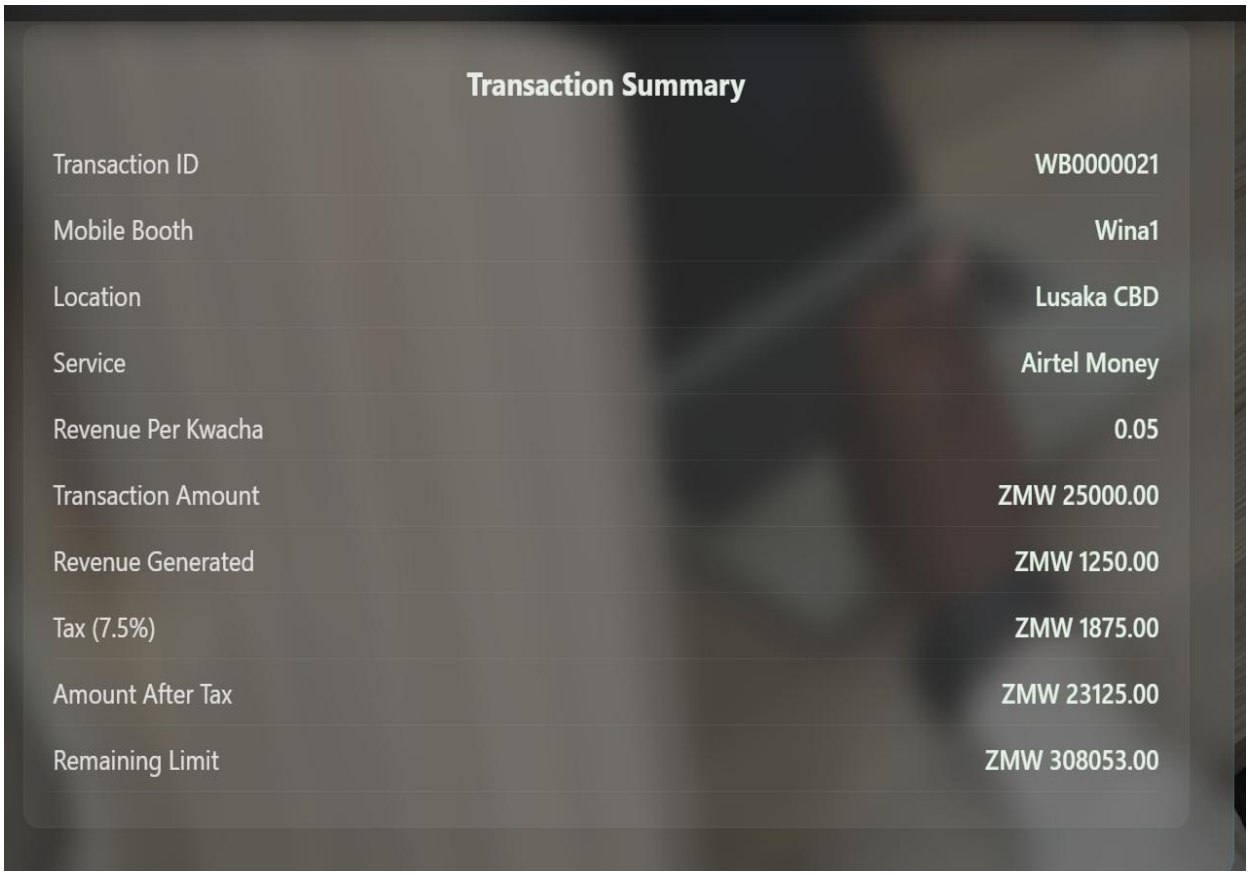

- Click the blue **Process Transaction** button.

5. Transaction Summary & Calculation Breakdown

After clicking **Process Transaction**, the **Transaction Summary** box appears with the calculated breakdown:

- **Revenue Generated:** Calculated as Amount × Revenue Rate.
- **Tax Deduction:** Automatically calculated based on network tax rules (7.5% for mobile money, 10.0% for bank services).
- **Amount After Tax:** Net total after statutory tax deductions.
- **Remaining Limit:** Shows the remaining credit limit available for that network operator.

TRANSACTION SUMMARY

6. Built-in Service Limits & Rules

The system maintains cumulative transaction limits per service to ensure float balance compliance:

Service Network	Revenue Rate	Tax Rate	System Credit Limit
Airtel Money	K0.05 per Kwacha	7.5%	ZMW 350,000.00
MTN Money	K0.06 per Kwacha	7.5%	ZMW 160,000.00
Zamtel Money	K0.045 per Kwacha	7.5%	ZMW 70,000.00
Zanaco Express	K0.035 per Kwacha	10.0%	ZMW 80,000.00
FNB Express	K0.04 per Kwacha	10.0%	ZMW 80,000.00

Warning Alert: *If a transaction exceeds the remaining service credit limit, the terminal blocks the process and displays a notification: "Insufficient credit for [Service Name]! Remaining: ZMW X, Requested: ZMW Y".*

7. Support & Troubleshooting

If you encounter technical issues during your shift:

- **Support Phone:** +260 97 1234567
